

VILNIUS COLLEGE OF TECHNOLOGIES AND DESIGN

About us

Vilnius College of Technologies and Design is an institution of higher education offering sixteen full-time study programs in design, civil engineering, technical sciences, and transportation, partial studies through exchange programs, as well as informal study courses and training.

At Vilnius College of Technologies and Design the studies focus on practical activities, which enables students to acquire specialized background and achieve a professional bachelor's degree. In addition to receiving real expertise, students also become part of an active and creative future generation of professionals with the ability to compete in the Lithuanian and European labor market.

For this reason the college continuously updates its study programs, improves qualifications of the teaching staff and upgrades the training facilities. The college ensures that the students enjoy the best possible training and living conditions – we have modernized our library, set up distance learning center and renovated our campus.

Facilities

Vilnius College of Technologies and Design has two campuses in convenient locations. The commute to the city center via public transport is fast and easy.

There are several dormitories available to the students with different accommodation types – from modest budget rooms with common showers and kitchens to block rooms where 2 rooms share a shower and a kitchen.

Studying in Vilnius

Studying in Vilnius, the capital of Lithuania, is a great experience. Vilnius is a beautiful city in the heart of Europe – it is modern, green and full of culture. Hosting multiple universities, the city is full of young people. The public transportation system is extensive and affordable.

Study programs

Vilnius College of Technologies and Design currently has around 2000 students and 200 professors and other staff members. The scope of all study programs is 3 years (180 ECTS credits). The academic year is split into two semesters – autumn and spring. Upon graduation the students are awarded with the professional bachelor diploma.

There are 5 study programs available in English:

- Civil Engineering
- Transport Logistics
- Electrical and Automation Engineering
- Multimedia Design
- Graphic Design

Admission

The prerequisites for admission into the study programs at Vilnius College of Technologies and Design are: secondary education (high school, other equivalent) diploma, intermediate English language skills and artistic skills (for candidates to our Design study programs).

Tuition

Study program	Tuition/year
Electrical and Automation Engineering	2463 EUR
Transport Logistics	2100 EUR
Civil Engineering	2463 EUR
Multimedia Design	3776 EUR
Graphic Design	3776 EUR
